Objective: Green Owl Intrinsic Value Fund[®] seeks long-term capital appreciation.

Our Approach: Green Owl strives to achieve superior long-term performance through the purchase of equity securities of competitively advantaged and financially strong companies at prices substantially less than our assessment of their intrinsic (business) value. As such, we do not regard ourselves as traders of stocks, but rather as part owners of tangible businesses. We determine intrinsic values through fundamental principles of financial statement analysis and proprietary valuation techniques, which we apply consistently in all market environments.

Our Advantage: We believe equities purchased at prices significantly below their intrinsic worth should protect capital from significant, permanent loss and should also appreciate substantially when the market ultimately recognizes business value. Our critical research and buy discipline gives us confidence to establish diversified portfolios where our best ideas can have meaningful impact on performance.
